WILLIAMS.

From the News. The moral atmosphere at Williams has a putrid odor. The population of Williams has passid the two thousand mark. Ed Schultz, the popular wholesale liquor man of Albuquerque, has made Williams a visit this week.

The numerous freight trains that pass through night and day on the inta Fe, shows the vast amount of raffic that is going east.
The match game of beseball at Ash

Fork last Sunday between Ash Fork and Williams resulted in favor of Williams with a score of 17 to 6. J. Edward Pricat will build a variety theater at once. The structure will be a commodious affair, extend

ing from Rallroad to Williams avenue Two hundred tons of selected coppere will be shipped from the different tines next week, all of which sounds like prosperity.

Whitewater-Flerro Telegraph Line. The Western Union telegraph ith as been completed from Whitewater o Hanover, the construction from that solnt to Pierro being delayed by rea son of the non-arrival of pules. The gang yesterday commenced straightning the line from Bilver Cliy to Whitewater to conform with the hanges made in the railroad grade, The Whitewater-Fierro line will be apen for public business by July 1st .-

BIG TIME AT WINSLOW.

Old Fashioned Fourth of July Celebratio

at Winslow. An old fashioned Fourth of July cel brutton will be held at Winslow, Ari ona. Six hundred dollars in cash prizes will be given for hose ball games, horse races, bloyels races, wheel arrow, wack and foot races. More crade, speeches and music. In the vening a dance will be held at Winsw opers house. The committee continue a good time to everybody who anta Fe Pacific

THE NAVAJO INDIANS.

the Ladies' Home, where he is being They are industrious and Are Mak- suits. ing Progress in Civilization.

EXPERIMENT WITH SHEEP.

Colonel A. M. Tinker, of Washington City, who is spending a week at Santa Fe. inspecting the Indian schools and nited States agency, has just comthese Indians contented and prosperous under Agent G. W. Hayzlett's administration of affairs. From a moral and law and order point of view their advancement in the past few years has been very marked. A leading spirit among them is Chief Shee, whose nother was a Navajo and whose father was an American named Dodge Shee's realth is approximated at \$75,000. He thrifty and a keen trader, and has tores on the reserve, hestdes a good form and a great many horses, sheep and goats. He has a powerful influence for good and his opinions are respected by all, Indian and white men allice

GOOD WORKERS. The Navajoes are good workers and late years have shown their capaity to earn wages by doing most of the heavy work along the railroads in western New Mexico and Arlsona. Last year they carned in such work over \$70,000, Merchant Cotton of Gallup, makes it his duty and pleasure to seure them rallroad work, Within a few days past he sent out a call for 200 Navalues to work on the railroad, but recerved only haif of the men wanted as most of the able-bodied men of the tribe are now engaged with their fields and flocks.

Something more than \$100,000 annually is received by the Navajoes from the sale of their blankets Probably twice this amount is secured from the sales of their wood, hides, pelts and poples. The area of their cultivated fields can be very largely increased by the construction of Irrigation ditches The government has done something in ill attend. Excursion rates on the this direction but impractical men have been sent out to manage the job and perhaps \$100,000 of government money has been frittered away with little o A. F. Stone, who started out to take nothing to show for it. But the policy the centus of the Navajor on that por- of the Indian office is all right and it ime the Navajoreserve will be supplied with an adequate irrigation system ecident about eighty miles north of such as is now receiving its finishing

SHEEP RAISING.

Sheep raising will always be the chief idustry of the Navajoes. Their lands are admirably adapted to it, and now, after years of stubborn resistance, the indian flock masters are breaking away from their old custom of runing mixed flocks of the two sexes toof the industry as to breeding, crossing hearing and sanitation is supplanting heir ancient sup-shod methods. Chief Show's healthy influence is especially notable in this matter. It was found years ago that the Navajo sheep were such hustlers, ranging 15 to 50 miles a lay with ease that the higher grade heep could not follow them and survive. For this reason the several atempts of the government to improve he flacks by introducing fine bred aucks has come to naught, but Chief Shee has experimented on his own behalf until he has solved this problem He brought in a lot of Merino bucks and took special care in handling them and he secured a cross or grade of quarting qualities of the native animal valle producing a higher quality of god results of Chief Shee's experimen Colonel Tinter has just written the In ian office urging that the Navajoes be armished 500 full blood Merico bucks cith which to improve their flocks, the saders among the Indians having agreed to care for them along iln similar to those originates by Chief management and is putting the major
